AMENDMENT TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-26. (Canceled)

27. (New) A method of managing a system site for e-commerce, comprising:

creating objects via a wizard which function to at least retrieve data from a database; and

creating scripts via a wizard which function to at least convert data retrieved by the objects to an HTML stream for real-time transmission to a browser resident on a client computer whereby actual HTML text files need not be created and stored on a Web server.

28. (New) The method as recited in claim 27, wherein the created objects and scripts further provide for adding data to the database.

29. (New) The method as recited in claim 27, wherein the created objects and scripts further provide for editing of data in the database.

30. (New) The method as recited in claim 27, comprising defining via a wizard a group of users having access to the database via the objects and scripts.

31. (New) The method as recited in claim 30, comprising developing via a wizard a common schema for use in presenting data to each of the group of users.

32. (New) The method as recited in claim 27, wherein the scripts comprise one or more selected from a group consisting of VBScript, JavaScript, and HTML.

33. (New) The method as recited in claim 27, comprising associating with the objects via a wizard one or more events whereby the objects will perform a process in response to the event.

34. (New) The method as recited in claim 27, comprising establishing via a wizard alternative means for accessing data in the database.

35. (New) The method as recited in claim 34, wherein the alternative means for accessing data from the database are at least one selected from a group consisting of email, fax, and phone.

36. (New) The method as recited in claim 34, comprising establishing via a wizard predetermined times for automatically accessing the database and transmitting data to a user via the alternative means.

37. (New) The method as recited in claim 27, comprising establishing via a wizard a billing matrix used in creating charges for system access.

38. (New) A readable media having computer executable instructions for use in managing a system site for e-commerce, the instructions performing steps comprising:

      accepting user input via a wizard to create objects which function to at least retrieve data from a database; and

accepting user input via a wizard to create scripts which function to at least convert data retrieved by the objects to an HTML stream for real-time transmission to a browser resident on a client computer whereby actual HTML text files need not be created and stored on a Web server.

39. (New) The readable media as recited in claim 38, wherein the instructions accept user input via a wizard to define a group of users having access to the database via the objects and scripts.

40. (New) The readable media as recited in claim 39, wherein the instructions accept user input via a wizard to develop a common schema for use in presenting data to each of the group of users.

41. (New) The readable media as recited in claim 38, wherein the scripts comprise one or more selected from a group consisting of VBScript, JavaScript, and HTML.

42. (New) The readable media as recited in claim 38, wherein the instructions accept user input via a wizard to associate with the objects one or more events whereby the objects will perform a process in response to the event.

43. (New) The readable media as recited in claim 38, wherein the instruction accept user input via a wizard to authorize alternative means for accessing data in the database.

44. (New) The readable media as recited in claim 43, wherein the alternative means for accessing data from the database are at least one selected from a group consisting of email, fax, and phone.

45. (New) The readable media as recited in claim 43, wherein the instructions accept user input via a wizard to establish predetermined times for automatically accessing the database and transmitting data to a user via the alternative means.

46. (New) The readable media as recited in claim 38, wherein the instructions accept user input via a wizard to establish a billing matrix used in creating charges for system access.

47. (New) The method as recited in claim 27, wherein the objects comprise COM objects.

48. (New) The method as recited in claim 38, wherein the objects comprise COM objects.
